DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: The measurement unit of the particle size distribution (B) is missing. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Otouma et al. (US 4,780,356).

Otouma discloses an ink jet recording sheet comprising a paper, an intermediate layer on the paper, and an overlayer containing porous particles (claim 1). The overlayer comprises particles having two particle size ranges, i.e., the first particle size is 0.1-50 um (claim 1) and the second particle size is 0.1-20 um (claim 8). The content of the particle having the second particle size is less than 70%, which falls within the claimed range of claim 2. The intermediate layer comprises particles that do not absorb ink, wherein the particles have a particle size of 0.05-200 um (claim 9). The particle in the overlayer is alumina (claim 5). The particle in the intermediate layer is silica-alumina (equivalent to the claimed cationically modified silica (col. 7, line 50)).

Allowable Subject Matter

4. Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Otouma neither teaches nor suggests having a layer containing crosslinking agent disposed between the intermediate layer and the overlayer.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 703-305-0389. The examiner can normally be reached on Mon.-Thur. 7:30AM-6:00PM.
